PROFILE

I'm a BCA student specializing in Artificial Intelligence and Machine Learning at Jain University, passionate about exploring how technology, innovation, and intelligent systems can be used to solve real-world problems. I enjoy learning through practical experience, building projects, collaborating with others, and continuously expanding my technical and creative skill set.

My interests span across Artificial Intelligence, Machine Learning, full-stack development, cloud technologies, and modern software systems. I recently completed a MERN Stack internship, where I worked on full-stack web application development using MongoDB, Express.js, React.js, and Node.js, gaining hands-on exposure to real-world development workflows and collaborative project environments. I'm currently looking for an AI/ML research internship to further strengthen my understanding of intelligent systems and research-driven technologies.

I'm also interested in participating in tech events, volunteering opportunities, hackathons, and research initiatives that allow me to collaborate with others, gain practical exposure, and grow within the technology community. I enjoy being part of environments that encourage innovation, teamwork, creativity, and continuous learning while helping me strengthen both my technical and communication skills.

I'm someone who enjoys exploring new domains, adapting to evolving technologies, and building a strong interdisciplinary foundation across software development, Artificial Intelligence, cloud technologies, and problem-solving. As I continue my journey in tech, I'm always open to opportunities that challenge me to learn, innovate, collaborate, and contribute meaningfully to the growing technology ecosystem.

EDUCATION

Jain (Deemed-to-be University), Kochi

June 2025 - Present

Bachelor of Computer Applications (BCA) - Artificial Intelligence & Machine Learning | CGPA: 9.3/10

The School of the Good Shepherd, Trivandrum

(2024)

Secondary & Higher Secondary Education - CBSE (Science Stream with Informatics Practices) | 98.4%

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript

Web Development: React.js, Node.js, Express.js, HTML, CSS

Databases: MongoDB, MySQL

Core Concepts: Data Structures & Algorithms, OOP, REST APIs, Authentication (JWT)

AI/ML Foundations: NumPy, Pandas, Matplotlib, Python, Streamlit, LangChain, Groq API, FAISS, HuggingFace

Tools: Git, GitHub, VS Code

EXPERIENCE

Luminar Technolab, Kochi

March 2026 - May 2026

MERN Stack Intern

- Built full-stack web applications using React.js, Node.js, Express.js, and MongoDB
- Developed RESTful APIs and implemented secure authentication using JWT
- Designed and deployed CRUD-based applications with efficient database integration

Digital University of Kerala (IIITM-K), Trivandrum

June 2026 - Present

AI/ML Research Intern

-

PROJECTS

Nyvora - ECart | MERN Stack Project | [GitHub](#)

March 2026

- Developed a full-stack fashion e-commerce platform using the MERN stack with responsive UI and modern component-based architecture.
- Implemented shopping cart, wishlist, product catalog, dynamic routing, and state management using React Context API.
- Designed scalable frontend modules and RESTful backend integration supporting future authentication and payment gateway features.
- Applied best practices in React, JavaScript, and Tailwind CSS to create a production-style e-commerce application.

NoteBot AI (RAG-based AI ChatBot) | Personal Project | [GitHub](#)

June 2026

- Architected a localized Retrieval-Augmented Generation (RAG) platform capable of processing academic PDF documents and generating context-aware, low-latency conversational responses.
- Developed an end-to-end document processing pipeline using LangChain text splitters for intelligent document chunking and Hugging Face's all-MiniLM-L6-v2 embedding model for semantic vector generation.
- Implemented high-performance semantic retrieval using FAISS vector indexing to enable efficient similarity search and accurate context grounding.
- Integrated Groq-hosted Llama 3.1 8B Instant models to deliver fast, scalable, and contextually relevant AI-generated responses.
- Designed and customized a Neo-Brutalist user interface in Streamlit with responsive layouts, enhanced usability, and modern visual aesthetics.
- Engineered application state management and routing workflows to support seamless transitions between document repositories and active conversational sessions.

TECHNICAL ENGAGEMENT & VOLUNTEERING

- Second place in AICTE Smart India Hackathon and participated in Tink-her-hack Hackathon by Tinkerhub, contributing to problem-solving and rapid prototyping.
- Attended GDG Cloud Kochi and AWS events like Google Cloud Community Day Kochi 2025, AWS Community Day Kochi (AI/ML Edition), and also helped organize a Women's Day event alongside the organizers of GDG Cloud Kochi.exploring cloud and AI applications.

- Served as Student Coordinator for the Technology Track at The Summit of Future by Jain University, managing execution and sessions.
- Delivered a speech at a Guinness World Record event, demonstrating communication skills.
- Attended workshops like the CrewAI Signal 2025 Indian Edition in Trivandrum and Google Antigravity Workshop conducted by ICT Academy of Kerala.
